

**Art. 365**

## **Cleaning Card for ATMs**

**with shutter function**

***FLOCKTECHNOLOGY***

---

Features	<i>FLOCKTECHNOLOGY</i> , two-sided, coded, moistened with pure, top quality solvent and packed in a practical tear-open pouch
Application	All automated teller machines (ATM) and credit card machines with security access system (shutters).
Characteristics	The ECS philosophy for machine maintenance is moist cleaning. The <i>FLOCKTECHNOLOGY</i> of this cleaning card guarantees a very high level of dirt absorption. Tests conducted by Sulzer Innotec clearly show that moist cleaning cards coated with flock achieve much better cleaning results.
Benefits	Excellent cleaning result thanks to the brushing effect, achieved by the <i>FLOCKTECHNOLOGY</i> . Machine failures and reading errors due to dirt are drastically reduced. Simple and easy handling, due to tear-open pouch. The used cleaning liquid is not conductive, does not corrode any materials and dries very fast.
Technical details	Basic material PVC, ISO coded, <i>FLOCKTECHNOLOGY</i> on either side, moistened in pure, top quality solvent, in a practical tear-open pouch. Dimensions: 54 x 86 x 0.96 mm
Article number	365.020.000
Verpackungseinheit	transparent box of 20 pieces
